

Chromalox Announces UK Office Relocation

PITTSBURGH, PA — [June 11, 2008] — Chromalox, a leading manufacturer of electric heat and control products, announced today that it is opening a new sales and operations office in Croydon, UK. Located in a newly refurbished building, the 6,500-square-foot office will house 48 employees. The office will provide design, sales and customer support services for Chromalox products throughout Europe, Middle East, Russia, Asia, Africa, and Australia.

“We are very excited about the new location,” said Stephen Valentino, Managing Director of Chromalox’s UK operations. “This opportunity to relocate our UK office to a more modern facility allows us to create an environment that is more conducive to our expert teams working closely together and focusing on project management, engineering, and domestic and international sales.”

With the broadest product line in the industry, Chromalox provides heat and control solutions for more processes than any company in the world. Chromalox products have also been manufactured and sold throughout Europe under the brand names Eltron, Bray, and Etirex. Chromalox components, controls, and systems can be designed and manufactured to meet all European and International standards and certifications.

“The markets served by this office are important to our future and we want to ensure our resources are aligned with the needs of these markets,” said Chromalox CEO Scott Dysert. “This move positions us to continue to provide market-leading design, engineering and customer support throughout the region.”

Effective June 2, the new address for Chromalox UK will be Unit 122, Lombard House, 2 Purley Way, Croydon Surrey, CR0 3JP, UK. The office’s main phone and fax numbers will remain the same (telephone: +44 (0)20 8665 8900; fax: +44 (0)20 8689 0571).
