

## Chromalox Announces 2009 Pricing

**PITTSBURGH, PA** -- January 16, 2009 -- Chromalox, the global leader in precision heat and control products and services announced a price increase for Chromalox, Ogden and Etirex brands. Chromalox has seen unprecedented increases in the majority of raw materials and operating costs during the last five years.

Chromalox has been able to offset many of these costs through aggressive cost containment programs and lean manufacturing efforts. However, despite these efforts, the company must pass some of these costs on to their customers. The increase is roughly 4% and will be effective February 16, 2009.

Chromalox continues to aggressively pursue cost containment programs, as well as internal plant efficiency improvements to minimize the impact of rising costs to our customers. Please feel free to contact your local Chromalox representative if you have any questions regarding this announcement.
