

Configuration Software and Communication Cables

Description

Chromalox Temperature and Power Controllers are accompanied by intuitive PC configuration software to make programming, monitoring, and troubleshooting control products much simpler. Create recipe files, clone configurations to multiple controllers, and email configuration files for remote troubleshooting all at the click of the mouse. All you need is the right software and communication cables and you are ready to get programming.

Configuration Software

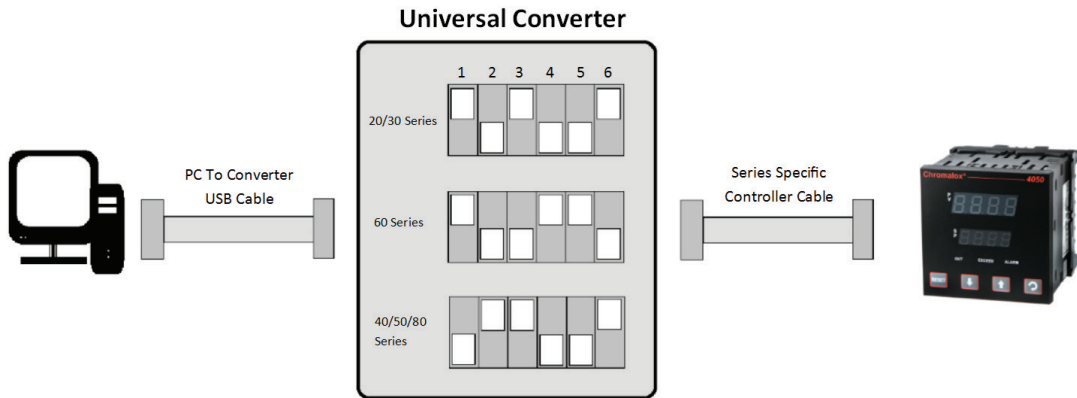

Software	Controller Series	Installation
C-PWR	C4, C4-IR, C4X, CTF, CTF-XTRA, CFW	Website Download
ChromaTemp	1020, 1030, 6020, 8020	Website Download
ChromaWare	4040, 6040, 8040, 4050, 6050	Website Download
1040 Workshop	1040	Website Download
ChromaloxPro	4081, 4082, 6060	CD (Licensed Software) - Part Number 0149-50092
