CWM cable special instructions denoted by *

1. Insert cable without the braid through pipe standoff and grommet as shown. Attach pipe standoff to pipe with pipe straps (Chromalox model PS not included). Leave braid outside of pipe standoff at grommet. For pipes smaller than 1 1/2” diameter a small pipe adapter (Chromalox model SPA not included) is required.

2. Score the outer insulation 1/2 inches from the end of cable. Lightly cut the outer jacket up the center to end of heating cable and remove the jacket from the cable.

3. Using wire cutters trim exposed grounding braid away from the end of the cable.

4. Adjust cable leaving 1” past the end of the grommet and insert the grommet into the pipe standoff. Attach extra cable to pipe as shown.

5. Slide end cap over cable. Grommet should be placed inside pipe standoff.

6. Tighten end cap until it bottoms out on pipe standoff.
