Rosemount™ 248 Wireless Temperature Transmitter

- Standard temperature transmitter offers a wireless solution for process monitoring
- Optimize plant efficiency and increase measurement reliability with industry-proven capabilities and specifications
- Emerson™ Smart Wireless delivers innovative wireless solutions for temperature measurement and overall transmitter performance
- Explore the benefits of Complete Point Solutions™ from Rosemount Temperature
Rosemount 248 Wireless Temperature Transmitter

Standard temperature transmitter offers a cost effective solution for wireless process monitoring

- Single sensor capability with universal sensor inputs (RTD, T/C, mV, ohms)
- IEC-approved WirelessHART® protocol
- Large LCD display (only available with enclosure option code P)

Optimize plant efficiency and increase measurement reliability with industry-proven capabilities and specifications

- One-year stability rating reduces maintenance costs
- User-centric device dashboards communicate important diagnostics and ensure process health
- Open/short sensor diagnostics assist with detecting issues in the sensor loop
- Compensation for ambient temperatures enhances transmitter performance
- Four user-configurable alerts provide increased process information and measurement point insight (only available with enclosure option code P)

Smart Wireless delivers innovative wireless solutions for temperature measurement and overall transmitter performance

- Self-organizing network delivers information rich data with >99% data reliability and establishes a highly stable network
- Smart Wireless capabilities extend the full benefits of PlantWeb™ to previously inaccessible temperature measurement locations
- Emerson SmartPower™ solutions provide an intrinsically safe Power Module, allowing field replacements without removing the transmitter from the process, keeping personnel safe and reducing maintenance costs
- Emerson Process Management’s layered approach to wireless network security ensures that data transmissions are secure
Explore the benefits of a Complete Point Solution from Rosemount Temperature Measurement

- An “Assemble To Sensor” option enables Emerson to provide a complete point temperature solution, delivering an installation-ready transmitter and sensor assembly.

- Emerson offers a selection of RTDs, thermocouples, and thermowells that bring superior durability and Rosemount reliability to temperature sensing, complementing the Rosemount transmitter portfolio.

Experience global consistency and local support from numerous worldwide Rosemount Temperature manufacturing sites

- World-class manufacturing provides globally consistent product from every factory and the capacity to fulfill the needs of any project, large or small.

- Experienced Instrumentation Consultants help select the right product for any temperature application and advise on best installation practices.

- An extensive global network of Emerson service and support personnel can be on-site when and where they are needed.

- Make wireless installation and configuration easy with the Emerson Smart Wireless Gateway.

- For wireless applications that require superior accuracy, consider the Rosemount 648 Wireless Temperature Transmitter.

- Explore how Emerson’s intrinsically safe SmartPower Solutions reduce maintenance costs.
The Rosemount 248 Wireless Temperature Transmitter has a rugged wireless transmitter design and industry-proven capabilities and specifications.

Transmitter features include:

- IEC-approved WirelessHART protocol (option code WA3)
- Large LCD display (option code M5)
- Internal antenna (option code WP5)
- 3-point calibration certificate (option code Q4)
- Assemble to Sensor options (option code XA)

**Software configuration**

| C1          | Custom configuration of date, descriptor, message, and wireless parameters (Requires CDS with order) | ★ |

**Extended product warranty**

| WR3         | 3-year limited warranty       | ★ |
| WR5         | 5-year limited warranty       | ★ |

**Typical model number:** 248 D X NA P 2 NS WA3 WP5 B5 M5 F6 WR3

1. Only available with enclosure option code D.
2. Only available with enclosure option code P.
3. When ordering a Rosemount 248 Wireless with the XA option, a mounting bracket is not included. If a bracket is required, order option code B5.
4. Green power module must be shipped separately, order Model 701PGNKF.
5. Black power module must be shipped separately, order Model 701PBKKF.
Specifications

Functional specifications

**Input**
Supports Thermocouple, RTD, millivolt, and ohm input types. See “Accuracy” on page 9 for a full listing of sensor options.

**Output**
IEC 62591 (WirelessHART), 2.4 GHz DSSS

**Local display**
The optional five digit integral LCD display can display sensor temperature in engineering units (°F, °C, °R, K, Ω, and millivolts) and percent of range. The display updates based on the wireless update rate.

**Humidity limits**
0–99% non-condensing relative humidity

**Update rate**
WirelessHART, user-selectable 1 second to 60 minutes

**Accuracy (Pt 100 @ reference condition: 20 °C)**
±0.81 °F (±0.45 °C)

**Wireless radio (WP5 and WK1 options)**
Frequency: 2,400–2,485 GHz
Channels: 15
Modulation: IEEE 802.15.4 compliant DSSS

Physical specifications

**Material selection**
Emerson provides a variety of Rosemount product with various product options and configurations including materials of construction that can be expected to perform well in a wide range of applications. The Rosemount product information presented is intended as a guide for the purchaser to make an appropriate selection for the application. It is the purchaser’s sole responsibility to make a careful analysis of all process parameters (such as all chemical components, temperature, pressure, flow rate, abrasives, contaminants, etc.), when specifying product, materials, options and components for the particular application. Emerson Process Management is not in a position to evaluate or guarantee the compatibility of the process fluid or other process parameters with the product, options, configuration or materials of construction selected.

**Conformance to specifications (±3σ [Sigma])**
Technology leadership, advanced manufacturing techniques, and statistical process control ensure specification conformance to at least ±3σ.

**Electrical connections**

**Power module**
The Emerson SmartPower power module is field replaceable, featuring keyed connections that eliminate the risk of incorrect installation.

The power module is an Intrinsically Safe solution, containing Lithium-thionyl chloride with a polybutadine terephthalate (PBT) enclosure.

The Rosemount 248 Wireless has a power module life time rating of 10 years with a one minute update rate at reference conditions.(2)

**Sensor terminals**
Sensor terminals permanently fixed to terminal block

---

1. Only available with enclosure option code P.
2. Reference conditions are 70 °F (21 °C), and routing data for three additional network devices.

Note: Continuous exposure to ambient temperature limits –40 °F or 185 °F (–40 °C or 85 °C) may reduce specified life by less than 20 percent.
Field Communicator connections

Communication terminals
HART® interface connections fixed to the power module (polymer housing)
Clips permanently fixed to terminal block, designated by the text “COMM” (aluminum housing)

Materials of construction

Enclosure
Housing: PBT/PC or low-copper aluminum with NEMA® 4X and IP66/67
Paint: Polyurethane (aluminum housing)
Cover O-ring: Silicone (polymer housing), Buna-N (aluminum housing)
Conduit entry: 316 SST (polymer housing)

Antenna
PBT/PC integrated omni-directional antenna (aluminum housing)

Mounting
Transmitters may be attached directly to the sensor. Mounting brackets also permit remote mounting. See “Dimensional Drawings” on page 15.

Weight
Engineered polymer
248 without LCD display: 0.99 lb (0.45 kg)
248 with LCD display: 1.11 lb (0.51 kg)

Aluminum
3.03 lb (1.38 kg)

Enclosure ratings
Type 4X and IP66/67

Performance specifications

Electromagnetic Compatibility (EMC)
Meets all relevant requirements of IEC 61326

Transmitter measurement stability
±0.15% of output reading or 0.15 °C (whichever is greater) for 12 months

Self calibration
The analog-to-digital measurement circuitry automatically self-calibrates for each temperature update by comparing the dynamic measurement to extremely stable and accurate internal reference elements.

Vibration effect
The Rosemount 248 Wireless (direct and remote mounted with enclosure option code D and direct mounted with enclosure option code P) are tested to the following specifications with no effect on performance per IEC 60770-1, 1999:

<table>
<thead>
<tr>
<th>Frequency</th>
<th>Acceleration</th>
</tr>
</thead>
<tbody>
<tr>
<td>10–60 Hz</td>
<td>0.21 mm peak displacement</td>
</tr>
<tr>
<td>60–2000 Hz</td>
<td>3 g</td>
</tr>
</tbody>
</table>

The Rosemount 248 Wireless (remote mounted with enclosure option code P) is tested to the following specifications with no effect on performance per IEC 60770-1, 1999:

<table>
<thead>
<tr>
<th>Frequency</th>
<th>Acceleration</th>
</tr>
</thead>
<tbody>
<tr>
<td>10–60 Hz</td>
<td>0.15 mm peak displacement</td>
</tr>
<tr>
<td>60–500 Hz</td>
<td>2 g</td>
</tr>
</tbody>
</table>
Sensor connections

</table>

1. The published digital accuracy applies over the entire sensor input range. Digital output can be accessed by HART Communications or wireless protocol.
2. Total digital accuracy for thermocouple measurement: sum of digital accuracy +0.8 °C (cold junction accuracy).
3. Digital accuracy for NIST Type B T/C is ±16.2 °F (± 9.0 °C) from 212 to 572 °F (100 to 300 °C).
4. Digital accuracy for NIST Type K T/C is ±35.79 °F (± 2.1 °C) from –292 to –130 °F (–180 to –90 °C).

</tr>
</tbody>
</table>
Transmitters can be installed in locations where the ambient temperature is between –40 and 185 °F (–40 and 85 °C). In order to maintain excellent accuracy performance, each transmitter is individually characterized over this ambient temperature range at the factory.

**Temperature effects example**

When using a Pt 100 ($\alpha = 0.00385$) sensor input at 30 °C ambient temperature:

- Digital temperature effects: $0.009 \times (30 - 20) = 0.09 ^\circ C$
- Worst case error: Digital + Digital temperature effects = $0.45 ^\circ C + 0.09 ^\circ C = 0.54 ^\circ C$
- Total probable error: $\sqrt{0.45^2 + 0.09^2} = 0.459 ^\circ C$

---

1. Change in ambient is with reference to the calibration temperature of the transmitter 68 °F (20 °C) from factory.
2. Ambient temperature effect specification valid over minimum temperature span of 50 °F (28 °C).

Transmitters can be installed in locations where the ambient temperature is between –40 and 185 °F (–40 and 85 °C). In order to maintain excellent accuracy performance, each transmitter is individually characterized over this ambient temperature range at the factory.
Product Certifications

Rev 1.5

European Directive Information

A copy of the EC Declaration of Conformity can be found at the end of the Quick Start Guide. The most recent revision of the EC Declaration of Conformity can be found at EmersonProcess.com/Rosemount.

Ordinary Location Certification

As standard, the transmitter has been examined and tested to determine that the design meets the basic electrical, mechanical, and fire protection requirements by a nationally recognized test laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

Telecommunication Compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification. Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: This devices may not cause harmful interference, this devices must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

Installing Equipment in North America

The US National Electrical Code® (NEC) and the Canadian Electrical Code (CEC) permit the use of Division marked equipment in Zones and Zone marked equipment in Divisions. The markings must be suitable for the area classification, gas, and temperature class. This information is clearly defined in the respective codes.

USA

I5 USA Intrinsically Safe
Certificate: 70008071 (Polymer housing)
FM 3611:2004; UL 61010-1:2012;
UL 50E:2012; ANSI/IEC 60529:2004
Markings: Intrinsically Safe: CI I, DIV 1, GP A, B, C, D;
CI I, DIV 2, GP A, B, C, D;
Class I, Zone 0, AEx ia IIC T4/T5 Ga;
T4(−50 °C ≤ T₀ ≤ +70 °C);
T5(−50 °C ≤ T₀ ≤ +40 °C); when installed per Rosemount drawing 00249-2020; Type 4X;
IP66/67
See Table 4 at the end of the Product Certifications section for Entity Parameters.

Special Condition for Safe Use (X):
1. Battery Exchange: The battery module can be change inside hazardous gas-explosive locations. During battery change it must be assured that the connections are free from dust or dirt.

I5 USA Intrinsically Safe
Certificate: 3039717 (Aluminum housing)
FM Class 3611:2004; FM Class 3810:2005;
Markings: IS CI I/II/III, DIV 1, GP A, B, C, D, E, F, G;
IS CI I, Zone 0, AEx ia IIC; NI CI I, DIV 2,
GP A, B, C, D; T4(−50 °C ≤ T₀ ≤ +70 °C),
T5(−50 °C ≤ T₀ ≤ +40 °C) when installed per Rosemount drawing 00249-1000; Type 4X;
IP66/67
See Table 4 at the end of the Product Certifications section for Entity Parameters.

N5 USA Nonincendive and Dust-Ignitionproof
Certificate: 3039717 (Aluminum housing)
ANSI/IEC 60529: 2004
Markings: NI CI I, DIV 2, GP A, B, C, D;
T4(−50 °C ≤ T₀ ≤ +70 °C);
DIP CI II/III, DIV 1, GP E, F, G;
−50 °C ≤ T₀ ≤ +85 °C; when installed per Rosemount drawing 00249-1000; Type 4X;
IP66/67
Canada

I6 Canada Intrinsically Safe
Certificate: 70008071 (Polymer housing)
Standards: CSA C22.2 No. 0-10; CSA C22.2 No. 94.2-07 (R2012); CSA C22.2 No. 213-M1987 (R2013); CAN/CSA-60079-0-11; CAN/CSA-60079-11-14; CAN/CSA C22.2 No. 60529-05; CAN/CSA-C22.2 No. 61010-1-12
Markings: Intrinsically Safe: CL I, DIV 1, GP A, B, C, D; CL I, DIV 2, GP A, B, C, D; Ex ia IIC T4/T5 Ga; T4(50 °C ≤ T3 ≤ 70 °C); T5(50 °C ≤ T3 ≤ 40 °C) when installed per Rosemount drawing 00249-2020; Type 4X, IP66/67
See Table 4 at the end of the Product Certifications section for Entity Parameters.

Special Condition for Safe Use (X):
1. Battery Exchange: The battery module can be change inside hazardous gas-explosive locations. During battery change it must be assured that the connections are free from dust or dirt.

I6 Canada Intrinsically Safe
Certificate: 1091070 (Aluminum housing)
Standards: CAN/CSA C22.2 No. 0-10; CSA Std. C22.2 No. 25-1966; CAN/CSA C22.2 No. 94-M91; CAN/CSA C22.2 No. 157-92; CAN/CSA C22.2 No. 213-M1987; C22.2 No. 60529-05; CSA Std. C22.2 No. 142-M1987
Markings: Intrinsically Safe: CL I, DIV 1 GP A, B, C, D; Suitable for use in CL I DIV 2 GP A, B, C, D; T3C; when installed per Rosemount drawing 00249-1020; Type 4X, IP66/67
See Table 4 at the end of the Product Certifications section for Entity Parameters.

Europe

I1 ATEX Intrinsically Safety
Certificate: Baseefa14ATEX0359X (Polymer housing)
Markings: II 1 G Ex ia IIC T4/T5 Ga; T4(50 °C ≤ T3 ≤ 70 °C); T5(50 °C ≤ T3 ≤ 40 °C)
See Table 4 at the end of the Product Certifications section for Entity Parameters.

Special Condition for Safe Use (X):
1. The plastic enclosure may present a potential electrostatic ignition hazard and must not be rubbed or cleaned with a dry cloth.

I1 ATEX Intrinsically Safety
Certificate: Baseefa10ATEX0121X (Aluminum housing)
Markings: II 1 G Ex ia IIC T4/T5 Ga, T4(50 °C ≤ T3 ≤ 70 °C), T5(50 °C ≤ T3 ≤ 40 °C)
See Table 4 at the end of the Product Certifications section for Entity Parameters

Special Conditions for Safe Use (X):
1. The plastic antenna may present a potential electrostatic ignition hazard and must not be rubbed or cleaned with a dry cloth.
2. The Rosemount 248 enclosure may be made of aluminum alloy and given a protective polyurethane paint finish; however, care should be taken to protect it from impact or abrasion if located in a Zone 0 area.
International

I7  IECEx Intrinsic Safety
Certificate: IECEx BAS 14.0158X (Polymer housing)
Markings:  Ex ia IIC T4/T5 Ga, T4(–60 °C ≤ Ta ≤ +70 °C), T5(–60 °C ≤ Ta ≤ +40 °C);
See Table 4 at the end of the Product
Certifications section for Entity Parameters.

Special Condition for Safe Use (X):
1. The plastic enclosure may present a potential electrostatic
ignition hazard and must not be rubbed or cleaned with a
dry cloth.

I7  IECEx Intrinsic Safety
Certificate: IECEx BAS 10.0059X (Aluminum housing)
Markings:  Ex ia IIC T4/T5 Ga, T4(–60 °C ≤ Ta ≤ +70 °C), T5(–60 °C ≤ Ta ≤ +40 °C);
See Table 4 at the end of the Product
Certifications section for Entity Parameters.

Special Conditions for Safe Use (X):
1. The plastic enclosure may present a potential electrostatic
ignition hazard and must not be rubbed or cleaned with a
dry cloth.

Brazil

I2  INMETRO Intrinsic Safety
Certificate: UL-BR 15.0222X (Polymer housing)
Markings:  Ex ia IIC T4/T5 Ga, T4(–60 °C ≤ Ta ≤ +70 °C), T5(–60 °C ≤ Ta ≤ +40 °C);
See Table 4 at the end of the Product
Certifications section for Entity Parameters.

Special Condition for Safe Use (X):
1. The plastic enclosure may present a potential electrostatic
ignition hazard and must not be rubbed or cleaned with a
dry cloth.

China

I3  NEPSI Intrinsic Safety
Certificate: GYJ15.1143X (Polymer housing)
Standards:  GB3836.1-2010, GB3836.4-2010,
GB3836.20-2010
Markings:  Ex ia IIC T4/T5 Ga; T4(–60 °C ≤ Ta ≤ +70 °C), T5(–60 °C ≤ Ta ≤ +40 °C);
See Table 4 at the end of the Product
Certifications section for Entity Parameters.

Special Conditions for Safe Use (X):
1. Non-metallic parts incorporated in the enclosure of the product shall only be cleaned with a damp cloth to avoid electrostatic charge.
2. Must use Rosemount 701PCKNF SmartPower Green Power Module provided by the manufacture.

Japan

I4  TIIS Intrinsic Safety
Certificate: TC21031 (Polymer housing)
Markings:  Ex ia IIC T4 X (–20 °C ~ +60 °C)
See Table 4 at the end of the Product
Certifications section for Entity Parameters.

EAC

IM  Technical Regulation Customs Union (EAC) Intrinsic Safety
Certificate: TC RU C-US.AA87.B.00057
Markings:  0Ex ia IIC T4, T5 Ga X, T5(–60 °C ≤ Ta ≤ +40 °C), T4(–60 °C ≤ Ta ≤ +70 °C); IP66/IP67

Special Condition for Safe Use (X):
1. See certificate for special conditions.
